Dentist

- General Dentistry: Actively working in various private and public clinics for more than four years.
- Prosthetic Treatments: Fixed and removable prostheses, implant-supported prostheses, CAD/CAM-based digital workflows, occlusion and mastication assessments, and treatment planning.
- Aesthetic Restorations: Laminate veneers, composite aesthetic fillings, and teeth whitening applications.
- Restorative Dentistry: Aesthetic fillings, composite restorations, and CAD/CAM restorations.
- Endodontics: Root canal treatments and retreatment procedures.
- Periodontology: Scaling, curettage, and periodontal supportive treatments.
- Pedodontics: Restorative, extraction, and preventive treatments for pediatric patients.
- Surgical Procedures: All surgical interventions except implant surgery and impacted tooth extraction; prosthetic surgeries, routine extractions, root extractions, and complicated extractions.
- Botox Applications: Aesthetic and functional botulinum toxin injections.
